

The **Associate Degree in Web Design** prepares the student to become a Web Designer, an expert capable of dealing with the Internet's continuous string of advances, with the training and skills to define, create, and design them. A web designer configures telecommunications systems to ease people's access to content and audiovisual information. As an ISDA Web Design program graduate, you could be a: Web Designer, Web Art Director, Web Creative Director, Multimedia Designer, Web Specialist and Web Information Architect.
